

# MEAGAN RAMEY

## FULL STACK SOFTWARE ENGINEER

### SUMMARY

Full Stack Software Engineer with hands-on project experience operating remotely with a national team. Lifelong lover of Math, Science, and brain teasers. Dedicated to reading sociology focused books, playing Skyrim, Yu-Gi-Oh!, and Ticket to Ride.

### EXPERIENCE

#### SOFTWARE ENGINEER FACILITATOR

*(January 2021-current) FT Contract Position*

- Lead workshops to explain and enforce debugging, google foo, problem solving, and other programming skills
- QA Tested, left review comments, and graded submissions

#### KENZIE ACADEMY

*(January 2020-January 2021)*

*Software Development | Project Based Training | Indianapolis, IN (Remote)*

- Excelled in an intensive 12-month technical engineer training, earning front-end and full stack certification with over a 98% each quarter
- Gained proficiency in JavaScript and Python languages and frameworks, like React and Django, SQL and NoSQL databases, many other tools and technologies, including MongoDB, Node.js, and Express
- OOP, development, testing and debugging, designing interfaces, and building efficient algorithmic business solutions
- Productive and efficient member of remote team. Gathered requirements, met deadlines, and created real world applications involving virtual environments, unit testing, OOP, building and connecting to 3<sup>rd</sup> party RESTFUL API, web requests, and user authentication systems.
- **Hands-on project-based experience:**
  - [Spark](#), a new take on a dating app, in a 4-person team, which implemented authentication, CRUD operations, class-based views, custom users, and custom Django admin commands utilizing Django and Python.
  - [PowerTalkers](#) Scrum Master and developer on a 4-person team using MERN stack, deployed with Firebase, authentication and state managed by Firebase, Front-End created with Axios, React Router Dom and Bootstrap
